

Certificate SAF-2026/0001

This is to certify that

Global Export Company LLC

Business air travel – 2026

has reduced and offset the carbon footprint of its business air travel through

Sustainable Aviation Fuel (SAF) Climate Contribution

Emissions reduction achieved through the purchase and retirement of certified Sustainable Aviation Fuel, reported in line with the GHG Protocol (Scope 3) and CORSIA principles.

This certificate covers:

Business air travel – GHG Protocol Scope 3, Category 6

Total climate contribution: 42.6 tCO₂e (12,500 L SAF)

Verified climate contribution for the reporting period 01 January 2026 – 31 December 2026.

Issued on 06 July 2026 under the Enerphy climate-action programme.

The supporting carbon footprint report is provided overleaf.

SAF environmental attributes are retired; the reduction is additional.

Annex to Certificate No. SAF-2026/0001
Issued to Global Export Company LLC

Carbon Footprint Report

Sustainable Aviation Fuel (SAF)
Climate Contribution

Reporting Summary

This report accompanies the accepted climate contribution and summarises the business-travel emissions covered and the Sustainable Aviation Fuel (SAF) purchased and retired to reduce them.

Reporting period	01 January 2026 – 31 December 2026
Emissions scope	GHG Protocol Scope 3, Category 6 (business travel)
Gross emissions	42.6 tCO ₂ e
SAF purchased	12,500 litres
Emissions reduced	34.1 tCO ₂ e
Residual offset	8.5 tCO ₂ e

Emissions Covered

Activity	Distance (km)	tCO ₂ e
Short-haul flights (<1,500 km)	68,000	9.2
Long-haul flights (≥1,500 km)	214,000	33.4
Total		42.6

Reduction Method Sustainable Aviation Fuel

The contribution funds certified SAF delivered into the aviation fuel supply, displacing fossil jet fuel. Environmental attributes are tracked and retired on the holder's behalf so the reduction is claimed only once.

- Feedstock: Certified waste/residue (HEFA)
- Lifecycle reduction vs. fossil jet fuel: up to 80% vs. fossil jet
- Chain-of-custody: Mass-balance, book-and-claim

Methodology & Standards

- GHG Protocol Corporate Standard & Scope 3 (Category 6) accounting.
- ICAO CORSIA eligible-fuels principles for SAF emissions reduction.
- Emission factors: DEFRA / ICAO published datasets.

Verification

The underlying SAF purchase and retirement are verified through an independent registry. This certificate can be checked at: <https://verify.example/saf-0001>.

Certificate SAF-2026/0002

This is to certify that

Nile Foods S.A.E.

Business air travel – 2026

has reduced and offset the carbon footprint of its business air travel through

Sustainable Aviation Fuel (SAF) Climate Contribution

Emissions reduction achieved through the purchase and retirement of certified Sustainable Aviation Fuel, reported in line with the GHG Protocol (Scope 3) and CORSIA principles.

This certificate covers:

Business air travel – GHG Protocol Scope 3, Category 6

Total climate contribution: 18.3 tCO₂e (5,400 L SAF)

Verified climate contribution for the reporting period 01 January 2026 – 31 December 2026.

Issued on 06 July 2026 under the Enerphy climate-action programme.

The supporting carbon footprint report is provided overleaf.

SAF environmental attributes are retired; the reduction is additional.
